

A woman with long dark hair, wearing a yellow sweater, is holding a glowing blue tablet in her left hand and pointing her right index finger towards three floating bubbles. The bubbles are blue, purple, and green, each containing text. The background is a gradient of blue and orange with a soft pink circle on the left.

Interactive Learning

English Discoveries delivers a comprehensive, interactive learning experience built on proven pedagogical principles, enabling educators to teach effectively and helping students achieve real-world language mastery.

Interactive Learning

- 10 CEFR-aligned General English courses, from A1 (Beginner) to C1 (Advanced), addressing a broad range of learner needs
- Topic-based units integrating core skills (reading, writing, listening, speaking), grammar, and vocabulary
- State-of-the-art video-based speaking and listening activities for real-world communication practice
- AI Writing Evaluation with instant, automated feedback to support writing improvement
- AI Speech Recognition offering personalized pronunciation feedback
- Fully responsive, mobile-friendly design for learning anytime, anywhere

English for Employability

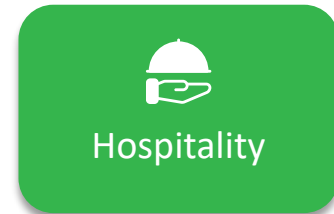

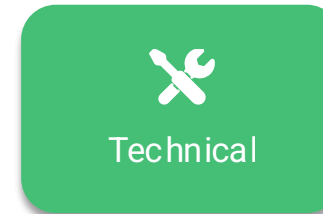

Our **English for Employability** courses are expertly designed to bridge the gap between general English and professional terminology.

English for Employability

- **Comprehensive Word Lists:** Targeted vocabulary for specialist sectors.
- **Interactive Dialogues:** Role-play simulations to provide practical exposure.
- **Teaching Objectives:** Clear goals ensuring a structured learning process.
- **Range of Proficiency Levels:** Students can access content according to their CEFR level
- **Flexible Integration:** Designed to combine smoothly with English Discoveries general English courses
- **Test Preparation:** TOEIC and TOEIC-Bridge –type items

Assessment and Certification

English Discoveries integrates a robust assessment framework aligned with ETS standards, offering educators reliable tools to measure progress and students the confidence to succeed in real-world certification settings.

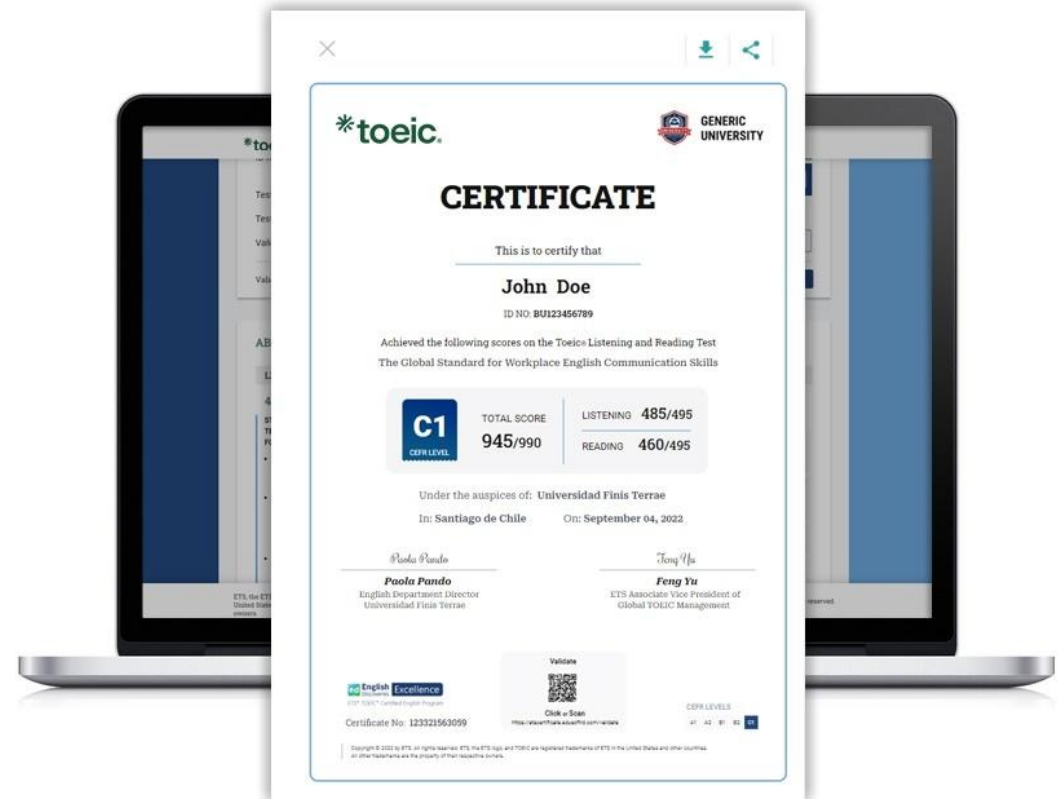

Assessment and Certification:

Measure Progress with Trusted, Automated Assessments

- Full suite of automatically scored assessments: placement, component, midterm & final
- AI Writing and Speaking Evaluation tools for instant performance feedback
- Assessments aligned with ETS's TOEIC® and TOEFL® frameworks
- Provides students and educators with a clear view of language proficiency

ETS® TOEIC® Certified English Program

Intelligent Management Systems

English Discoveries empowers educators with real-time insights and flexible management tools that support data-driven instruction, helping ensure student progress is continuously tracked and optimized.

Management Systems

Empowering Educators Through Real-Time Data & Customization

- Intuitive management tools help teachers monitor and enhance student performance
- Real-time dashboards show class-wide and individual progress
- Track task completion, test results, and time on task instantly
- Generate detailed reports to inform instruction and evaluation
- Use flexible customization tools to build and assign tailored lessons and content

A Full Range of Classroom Materials

English Discoveries' classroom materials reflect and reinforce the teaching objectives of the online learning content and promote communicative interaction in the classroom.

Classroom Materials

- Curriculum
- Lesson Plans
- Handouts
- Workbooks Printed
- Workbooks Digital
- Workbook Answer Keys
- Guided Discussions
- Teacher Guides
- Scope and Sequence

Teacher Training

Edusoft provides tailored training programs that prepare educators to implement English Discoveries effectively, ensuring confident use of all platform tools and alignment with institutional goals.

Teacher Training

Equipping Educators for Success

- Customized training programs to match each institution's implementation model
- Hands-on guidance across the English Discoveries platform, assessment tools, and management systems
- Practical training on how to effectively use classroom materials and blended learning techniques
- Helps teachers understand their evolving role in digital and distance learning environments
- Delivered by expert trainers to ensure confident and consistent instruction

Implementation and Support Services

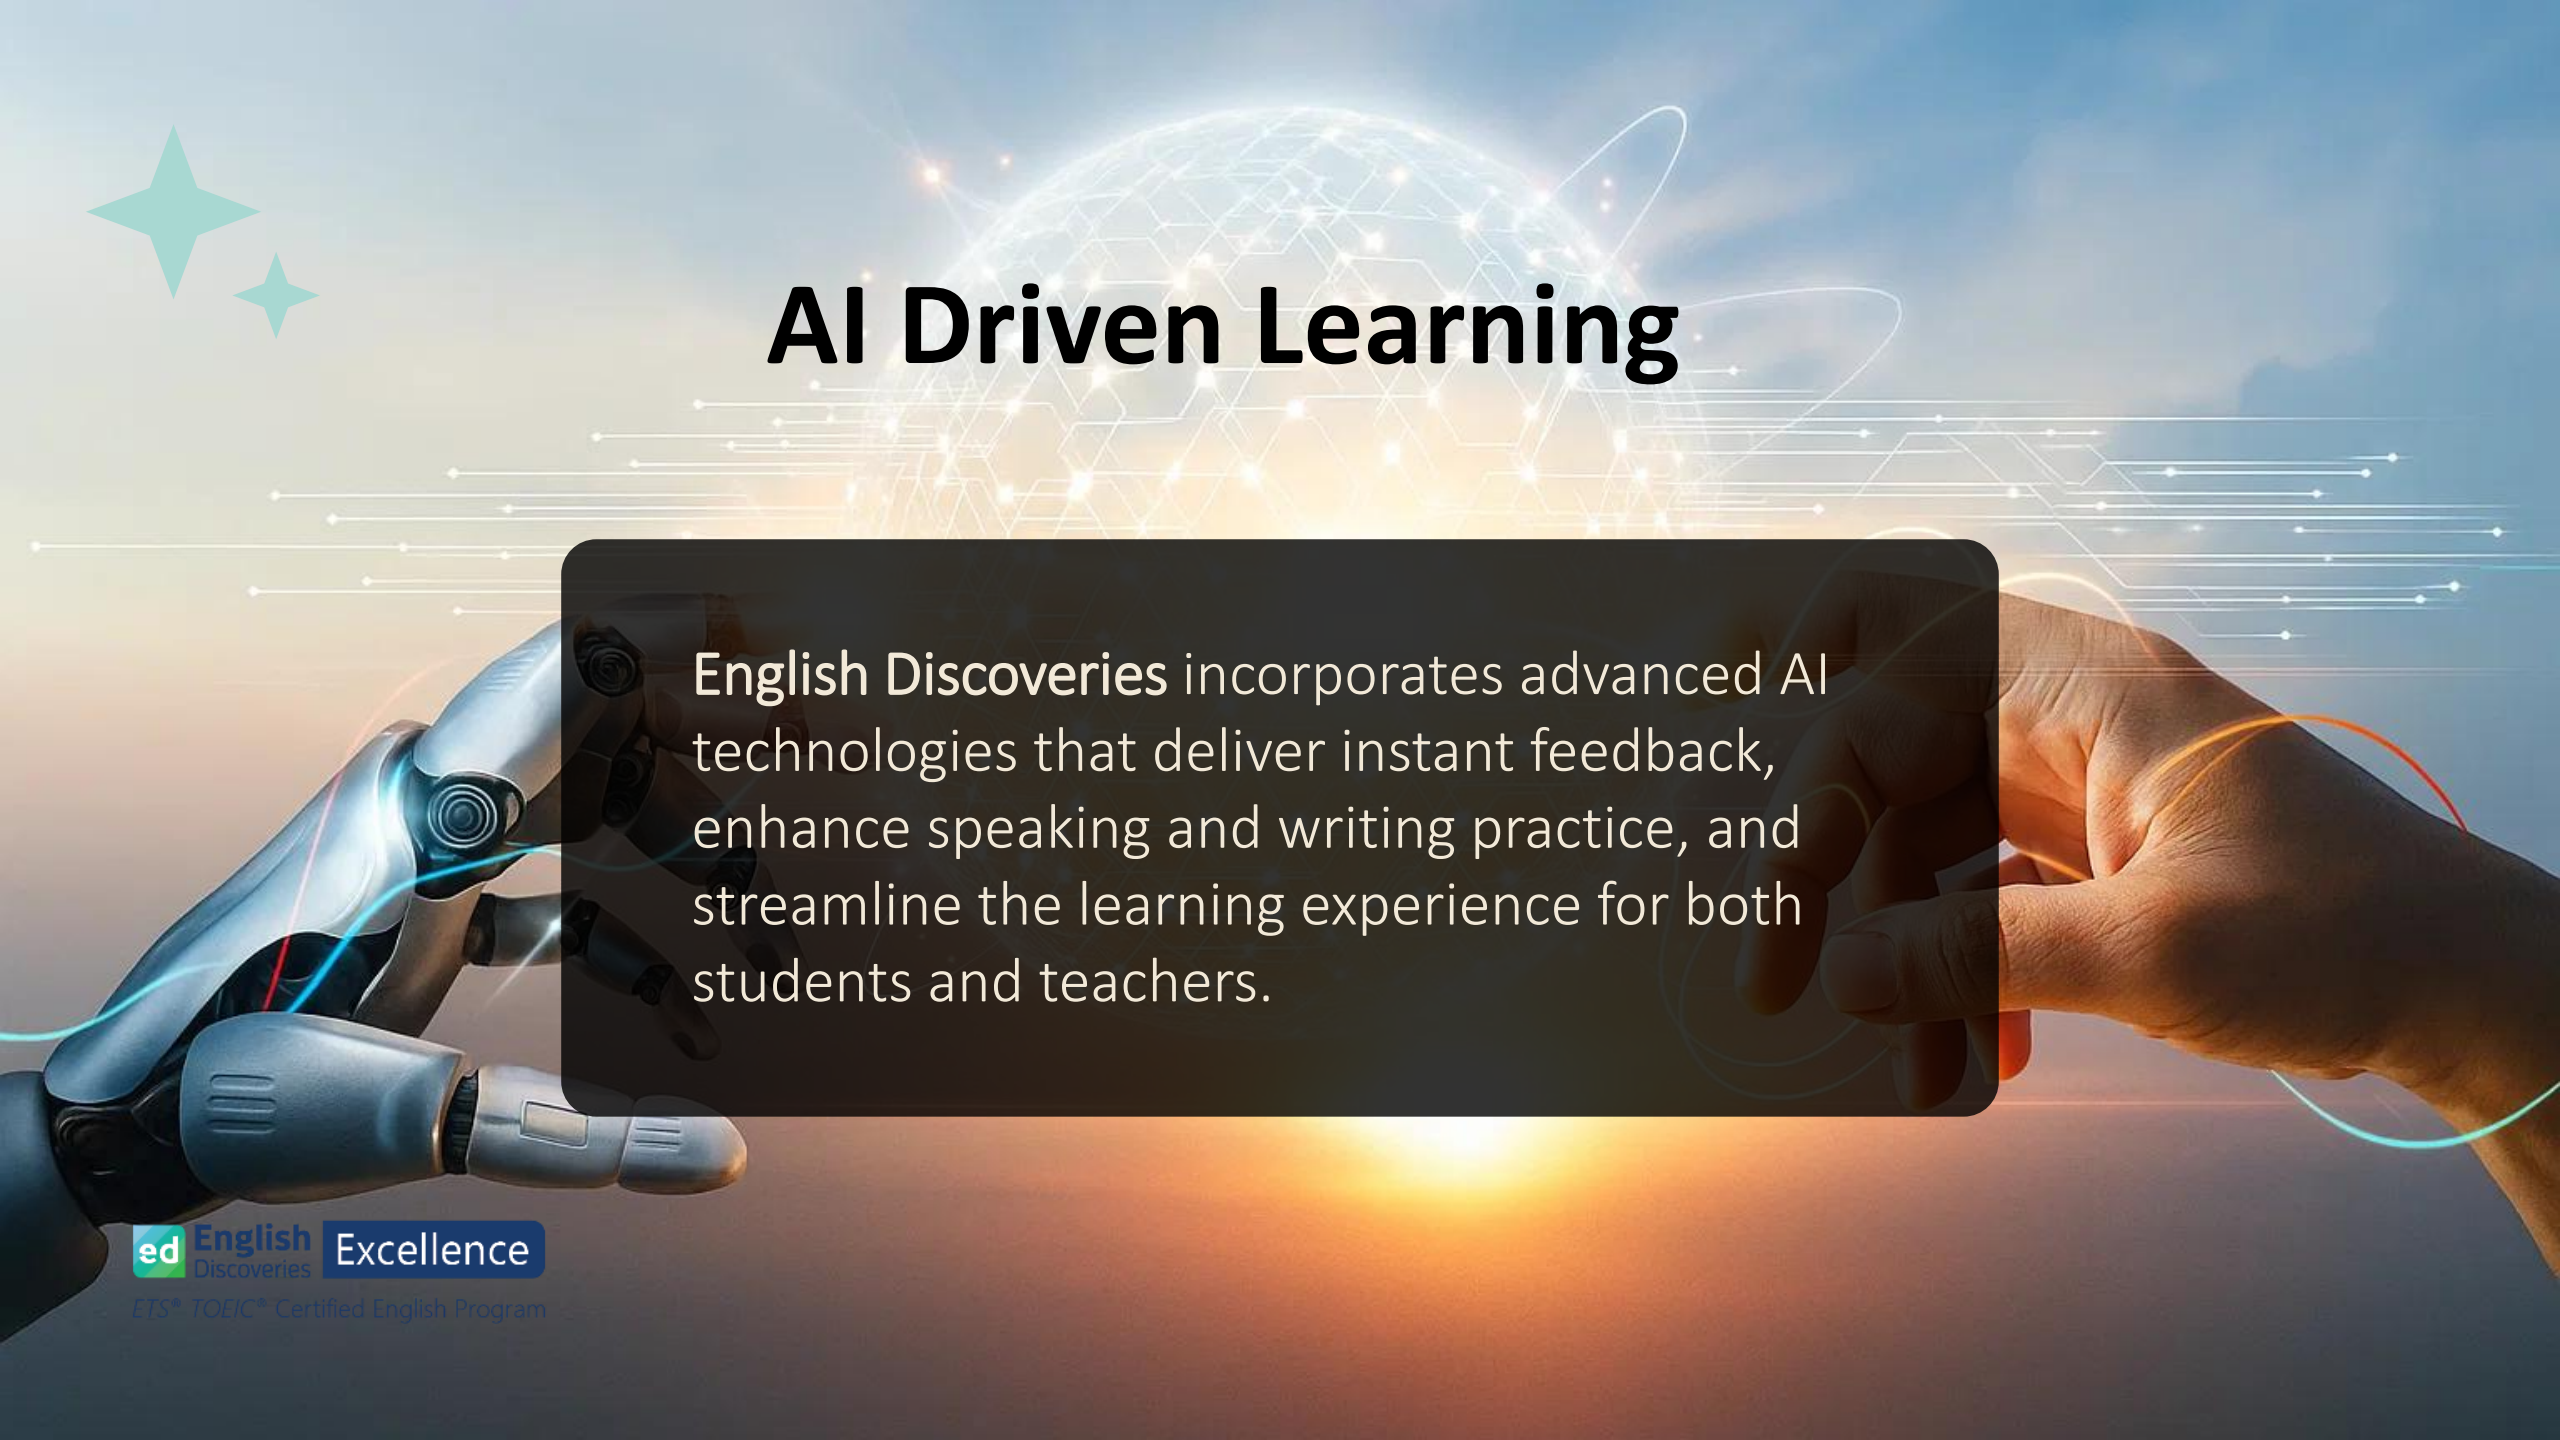

Edusoft provides continuous, hands-on support from implementation through long-term success, offering expert guidance, performance monitoring, and tailored services to ensure your solution evolves with your institutional needs.

Implementation and Support Services

Comprehensive Support for Long-Term Success

- A fully customizable platform tailored to meet your institution's goals and curriculum
- Seamless alignment with existing programs, delivery models, and schedules
- Ongoing support from Edusoft's team of pedagogical consultants, account managers, and technical experts
- Continuous monitoring and reporting to ensure successful implementation and measurable impact
- End-to-end project management to guide every stage of the rollout and beyond
- Committed to global data security and privacy standards—ensuring a safe, reliable, and compliant learning environment for institutions and learners

The background of the slide features a futuristic theme. At the top center is a glowing wireframe globe. Below it, a robotic hand on the left and a human hand on the right are shown reaching towards each other. The background is filled with abstract digital lines and light effects. In the top left corner, there are two teal stars.

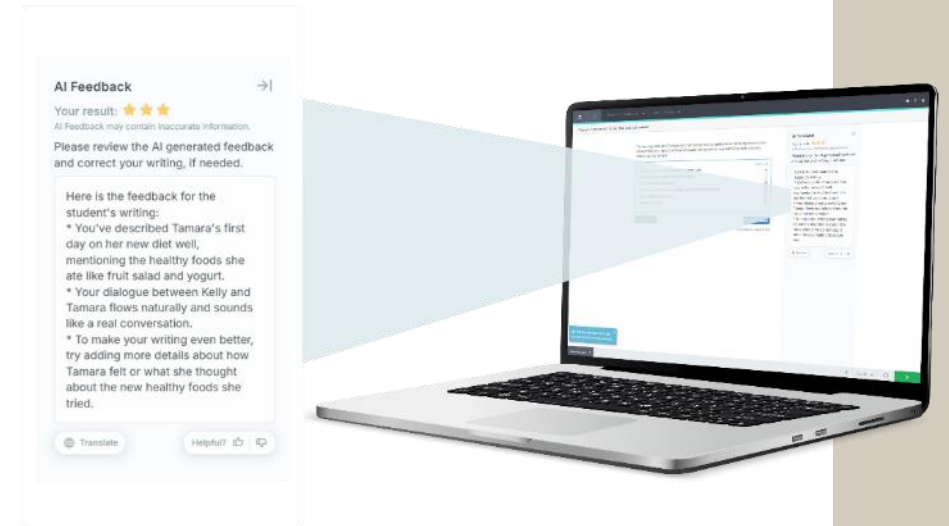

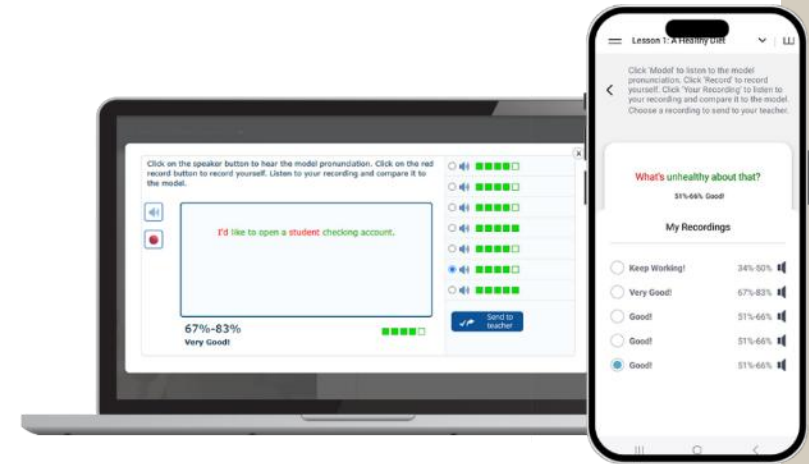

AI Driven Learning

English Discoveries incorporates advanced AI technologies that deliver instant feedback, enhance speaking and writing practice, and streamline the learning experience for both students and teachers.

AI Driven Learning

Accelerate Learning with Integrated AI

- **AI Writing Evaluation** provides instant, personalized feedback to help students improve grammar, coherence, and clarity
- **AI Speech Recognition** analyzes pronunciation in real time and supports multiple accents for inclusive learning
- Enhances learner autonomy with **immediate responses** that support independent practice and progress
- Seamlessly embedded into writing and speaking tasks — **no extra tools or setup required**
- Empowers educators with deeper insight into learner performance and progress
